Repeating Knot Cards

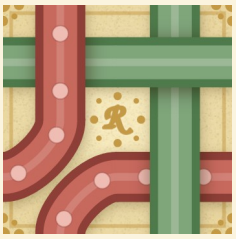

Justin Roughley, 2026

Four cards, nine wallpaper groups

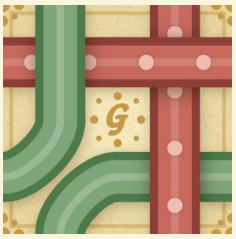

A pack of 60: forty-eight woven cards, nine target cards and three reference cards. Every card is a little patch of Celtic knotwork, and every one can be turned any way: wherever it goes, the ribbons still pass alternately over and under. Lay four cards in a square, repeat the square, and the knot takes on one of nine kinds of symmetry: nine of the seventeen wallpaper groups (en.wikipedia.org/wiki/Wallpaper_group).

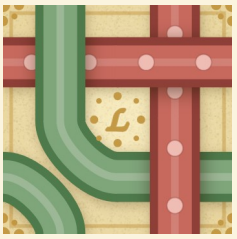

T × 16
four crossings: a trellis

R × 8
two red bends

G × 16
two green bends

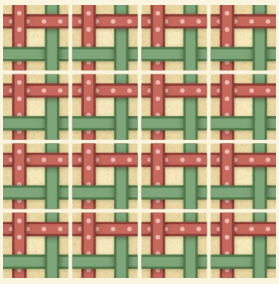

L × 8
a rounded L and a corner

FIND THE GROUP

1. Pick a target card. Lay out the four cards on its front, each turned so its letter faces as shown.
2. Make three more squares the same and join them: sixteen cards. Colours must match across every edge.
3. Look for mirrors, glides and turns, and name the group. Over and under count; colours do not.
4. Turn the target over to check: it names the group and marks its mirrors, glides and turns.

THE NINE TARGETS

With colours gives the group when the colours count too; *Shape only*, when over and under are ignored.

Repeating Knot Cards

four cards · nine wallpaper groups

1. Pick a target card, recipe side up.
2. Lay out its four cards in a square, each turned so its letter faces as shown.
3. Make four such squares and join them: sixteen cards. Match ribbon colours across every edge.
4. Find the mirrors, glides and turns. Which group is it?
5. Turn the target over to check.

READING THE BACKS

- mirror
- glide: reflect and slide
- half-turn centre
- quarter-turn centre

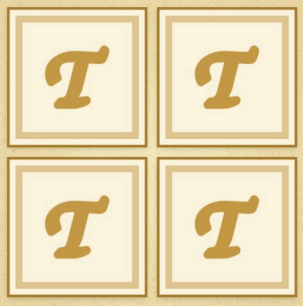

The name lists what a pattern has: a number for each kind of turn centre; ***** for mirrors, with a number after it for each kind of corner where mirrors meet; **×** for a glide that crosses no mirror; **o** for repeats only. In brackets: the crystallographers' name.

TO WONDER ABOUT

1. Why can't these cards make ***×**, the tenth group a square grid allows?
2. Change one card at a time. Can you visit all nine groups without repeating one?
3. How many strands of each colour does each pattern have?

TARGET 1

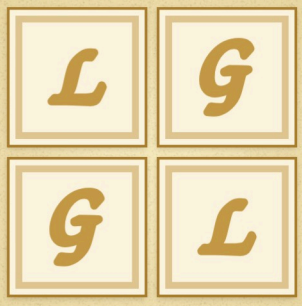

Make this square, then four of them. Which group is it? Turn over to check.

TARGET 2

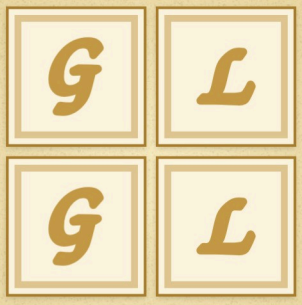

Make this square, then four of them. Which group is it? Turn over to check.

TARGET 3

Make this square, then four of them. Which group is it? Turn over to check.

TARGET 4

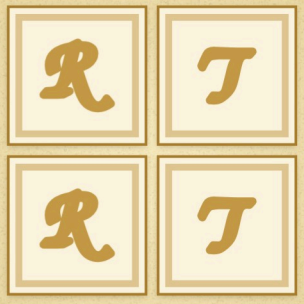

Make this square, then four of them. Which group is it? Turn over to check.

TARGET 5

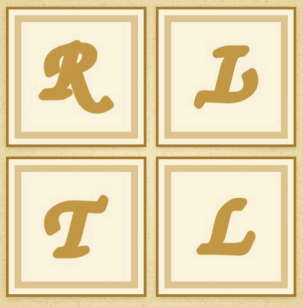

Make this square, then four of them. Which group is it? Turn over to check.

TARGET 6

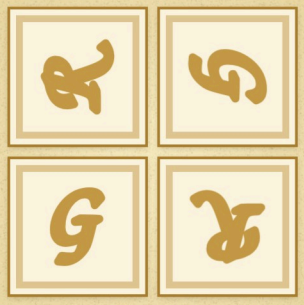

Make this square, then four of them. Which group is it? Turn over to check.

TARGET 7

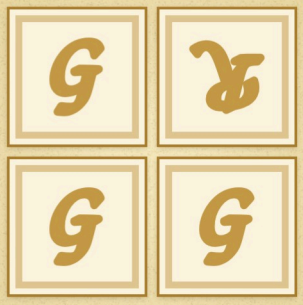

Make this square, then four of them. Which group is it? Turn over to check.

TARGET 8

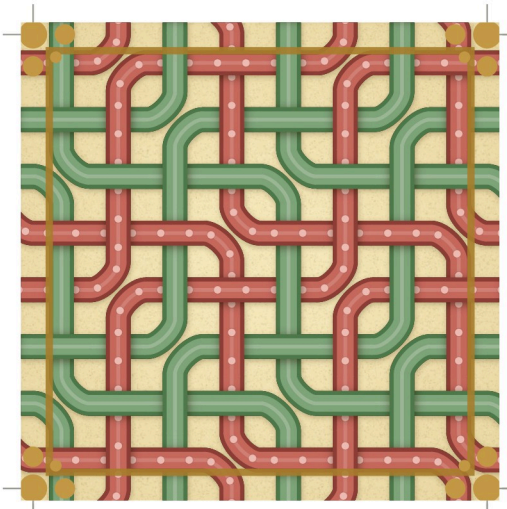

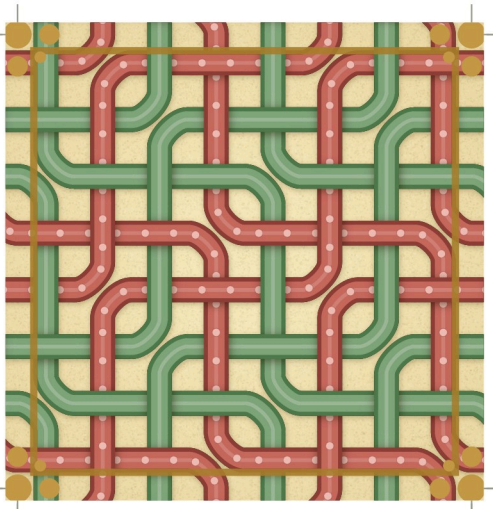

Make this square, then four of them. Which group is it? Turn over to check.

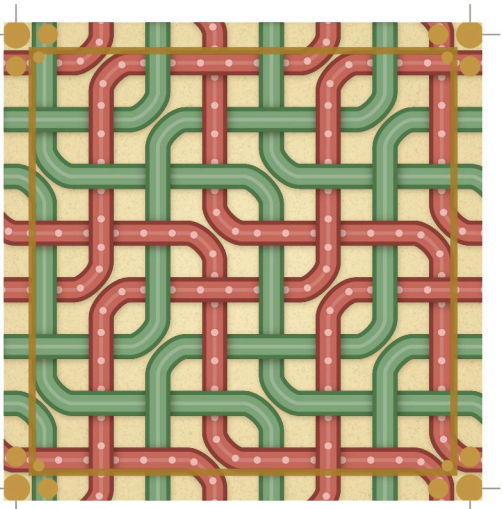

TARGET 9

Make this square, then four of them. Which group is it? Turn over to check.

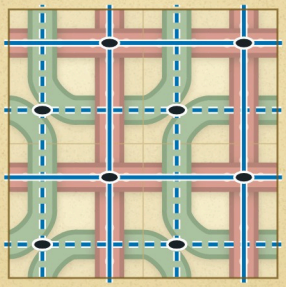

TARGET 3

2*22 (cmm)

Mirrors in two directions, half turns

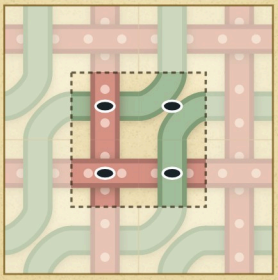

With colours same · Shape only ***442**

TARGET 2

2222 (p2)

Half turns only

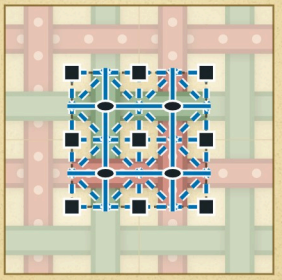

With colours same · Shape only **2*22**

TARGET 1

4*2 (p4g)

The plain weave: quarter turns and mirrors

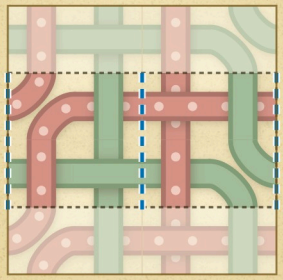

With colours ***2222** · Shape only ***442**

TARGET 6

×× (pg)

Glides only: reflect and slide

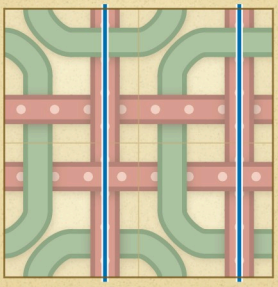

With colours **o** · Shape only same

TARGET 5

****** (pm)

Parallel mirrors only

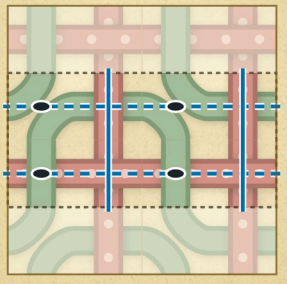

With colours same · Shape only ***2222**

TARGET 4

22* (pmg)

Parallel mirrors, half turns, glides

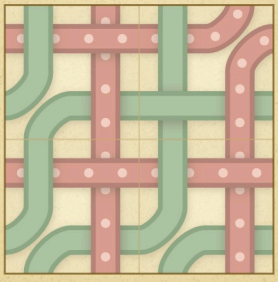

With colours same · Shape only same

TARGET 9

o (p1)

Translations only

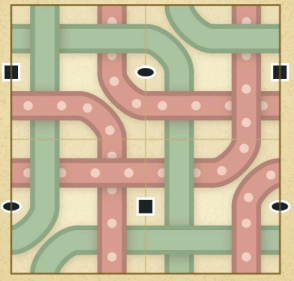

With colours same · Shape only ****

TARGET 8

442 (p4)

Quarter turns, no mirrors

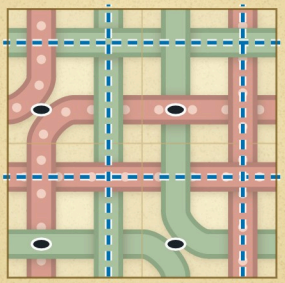

With colours **o** · Shape only **4*2**

TARGET 7

22× (pgg)

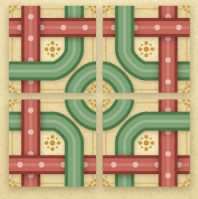

Half turns and glides, no mirrors

With colours **o** · Shape only **4*2**
